

## Techprep increase throughput with Cromax

Techprep, based in Westbury Wiltshire, have recently moved into purpose built premises to keep up with their ever expanding business base. They chose DuPont Refinish as their paint partner, principally for the outstanding support and compliant products, to deliver the highest possible standards and maximum throughput they required for their new venture. **Trevor White** Operations Director says "the move from solvent based products to waterborne technology was a daunting thought, as we have huge volumes to cope with, however we now use Cromax and the transformation is astounding! Our painters took to it straight away and have never looked back. They achieve outstanding results, the productivity has risen significantly and our customers are delighted. I can highly recommend Cromax to any bodyshop who has to change to meet the new legislation, it is the easiest and most probably the most profitable move you could ever make."

## Pendragon Group CD Bramall Change Paint System

**Roy Stevens** Bodyshop manager at CD Bramall in Plymouth, comments on their recent changeover "The transition to DuPont Refinish's Cromax was very professional indeed, DuPont sent in three demonstrators for one working week to make sure our six paint operatives had plenty of one to one training. In fact within three days all our staff were happy with the products, drying times and the final finish. In the same period full training was given for the paint mix scales and computer management to workshop and office staff. Throughout the week we had tremendous back up from both the DuPont representatives and our suppliers, who helped with the initial stock set up and pricing. Since our changeover we have been very pleased with the products, especially the ease of application, colour matching and the terrific final finish. We still enjoy good back up and regular visits to make sure that all the staff are happy and using best practice to obtain the best possible results. I have no hesitation in recommending DuPont Refinish and the Cromax products: our transition took place with ease and quickly dispelled our fears of changing over to a new paint scheme"

**DuPont Refinish**  
More than just paint ...

## Five Star Partner sings the praises of Cromax!

RVK is a Five Star partner who recently made the change from DuPont's Centari solvent borne products to the compliant Cromax waterborne system. **Bob Register** the owner comments "I had been putting off the change for quite some time, as I had envisaged many problems from my staff who were completely happy with the solvent products. However I knew the legislation changes were coming into effect and did not want to leave it to the last minute and encounter difficulties at a crucial stage. I decided to go ahead early and get all the problems out of the way as soon as possible, problems? What problems!!! The whole changeover was so smooth with no hitches, my painters really liked the new system as it was even quicker than the old faithful they had been using! So all my fears never materialized I only wish I had done it sooner! Cromax is a winner in my book and the support from DuPont Refinish is first class, thanks guys"
